You can premix your wipes solution and moisten a few wipes when you're out and about. Simply place them into a re-seal-able plastic bag, or into a travel wipes container and you're ready to go. Throw them into the dirty duds bag or a plastic shopping bag along with your diapers when you use them.

Common Cloth Wipe Solution Ingredients:

Many wipe solution recipes contain similar main ingredients, which are used for the same reason in each recipe. These are the common ingredients and why they're included:

Oil: Helps the wipe glide across baby's skin and keeps skin soft

Soap: Cleanses by removing all traces of urine and feces

EO: (Essential Oil) Added for antibacterial and/or aromatherapy purposes.

Water: The main ingredient in each recipe, cleanses the diaper area and dilutes the other ingredients

You may want to use the slightly more expensive paper towels like Bounty, as they do not rip and tear very easily

Baby Wipes #1

Ingredients:

- 1-2 drops tea tree oil
- 1-2 drops lavender oil
- 1 cup Distilled water

Instructions:

Mix solution together in a large bowl. Cut paper towel roll in half, using a large, sharp kitchen knife and remove center cardboard. Soak the towels in the solution till thoroughly wet. Squeeze out excess liquid and store in an old baby wipe container.

Baby Wipes #2
